

## **Adapting to New Technologies: A National Perspective**

***Dr. Stephen Catt, Deputy Director, Education and Workforce Development  
ARM- Advanced Robotics for Manufacturing***

ARM is one of 14 Manufacturing USA Institutes created to increase our national capacity for advanced manufacturing. Our focus is on robotics and automation that is implemented through advancing technologies, upskilling the workforce, and creating more effective ecosystems.

The need is urgent, global competition fierce, and knowledge increasing exponentially. How we came to be in this environment and how various regions across the nation are addressing these challenges will be presented. These concepts will provide some insight that will stimulate discussion and potential actions that can meet New Mexico's unique opportunities.
